

HIGH QUALITY AND YIELD

Grow to expect the best

RGT BIJOU

LATE PERENNIAL RYEGRASS

TYPE:

**LATE PERENNIAL
RYEGRASS
(TETRAPLOID)**

SPECIES:
GRASS

HEADING DATE:
31st MAY / 1st JUNE

CHARACTERISTICS:

- > Consistently high yields under both grazing and conservation management.
- > High quality.
- > Excellent disease resistance.

RGT Bijou.
Recommended
List 2021/22.

RGT BIJOU

LATE PERENNIAL RYEGRASS

PERFORMANCE DATA

GRAZING MANAGEMENT

	Mean of all G Varieties	Tetraploid Mean	RGT Bijou
Grazing Yield	100	103	101
Grazing D-value	77.2	77.5	75.2
ME Yield	100	103	99
Early grazing yield	100	95	97
Spring grazing yield	100	95	99
Early summer grazing yield	100	107	103
Late summer grazing yield	100	103	104
Autumn grazing yield	100	102	95

CONSERVATION MANAGEMENT

	Mean of all G Varieties	Tetraploid Mean	RGT Bijou
Total Yield (year 1)	100	101	101
1st & 2nd cut ME	100	105	105
Total Yield (year 3)	100	102	104
Total Yield (average)	100	102	102
1st cut yield	100	106	111
1st cut D value	71.9	71.9	69.5
2nd cut yield	100	102	101
2nd cut D value	73.2	73.8	72.1
3rd cut yield	100	98	90
4th+ cut yield	100	90	85

AGRONOMIC CHARACTERS

	Mean of all G Varieties	Tetraploid Mean	RGT Bijou
Ground Cover % (2nd harvest year)	65	62	63
Ground Cover % (3rd harvest year)	61	57	58
Autumn Ground Cover	6.2	5.7	5.9
Winter hardiness	7.0	7.1	7.2
Crown Rust	6.1	6.2	8.2
Dreschlara	6.6	8.0	8.1
Mildew	7.0	7.5	7.7
